to me

Dear Yitzhak,

Thank you for your e mail and attachments,
indeed I practice OIT as treatment of children with
IgE mediated food allergy(milk and egg).
I and other colleague of my group , only asking
children' parents for written informed consent .
Of note we practice the OIT only in allergic children aged
more than 4.

I and other pediatricians will try to organize " the 1st OIT Workshop"
in Italy on 2012.

In this context ,please, may you send my, via e mail, your complete address.

Regards
Giovanni
